 - A website where the user enters a city name and gets the current weather and a 5 day forecast.
 - Made with HTML, CSS, JavaScript, jQuery, Bootstrap, and the OpenWeather API
 - Live link at: <https://timholzer.github.io/Weather-Dashboard/>

--Work Experience

Web Developer/ Automation Software Developer

Make It So Engineering » <https://www.makeitsoeng.com/> ► May 2021 – Present

- This is a project based remote position with no schedule, so I can start full-time immediately.
- Developed and deployed websites for a variety of clients. This included web hosting and domain name setup, along with coding the websites from scratch.
- Developed software to automate various internal and external processes.
- Due to the company being smaller, my diverse skill set was occasionally utilized for various kinds of media creation that they didn't have other employees for, thus saving them from needing to hire multiple people to mostly do nothing.

New Frontiers Festival Docent (Seasonal)

Sundance Film Festival 2019/2020 » www.sundance.org ► Jan 2019 - Feb 2019, Dec 2019 - Feb 2020

- Set up and operated a variety of cutting edge VR and AR and XR experiences, including a Unity based mobile AR experience and experiences created by Magic Leap for the newly released MagicLeap One and their AI, Mica.
- Understood and explained the technology to entertainment and industry VIPs.

Freelance Web Developer, Video Automation, Animator, etc.

2010 - Present

- Created portfolio websites for people in my film making network.
- A recent project was helping Peter Hollens with creating software to automate video effects.

Senior Video Editor/ Software Developer

Foursteps » <https://www.foursteps.io/> ► February 2019 - August 2019

- Helped build the media department from the ground up. Set up the video style guidelines, while improving workflow by creating software for automated animated text creation.
- Developed their social media ad strategy and planned Facebook ad campaigns.
- Utilizing my knowledge of cutting edge technology and current trends, I developed strategies to grow the Foursteps brand, utilizing analytics to find what is most effective.

Video Editor/ Software Developer

Margle Media » <http://www.marglemedia.com> ► May 2017 - May 2018

- Developed software that automated a huge part of the video editing process, saving the company thousands of dollars in labor each month.
- I was one of the first employees at the startup and took on multiple roles, including creating standard operating procedures, and training new employees.
- Created content for some of the largest Facebook pages and a few Fortune 500 companies. I created hundreds of videos, with a total view count of over 2 billion.
- Received training for Facebook Business Manager and a social media video analytics software called Tubular to improve ads and video performance.
- Created the branding and animated video outros for clients.

Assistant Editor

About Face Media » <http://www.aboutface.media> ► March 2016 - May 2017

- Worked as an assistant editor on a variety of documentary projects including a Netflix film.
- Typically sifted through large amounts of footage to find the best content.
